

INDEX

- Adrenal gland, weight of, in feral mouse population, 40
- Age structure of a feral mouse population, 37
- Antrozous*, homing of, 206
- Area, familiar, of bats, 214
- Associations, of salt marsh plants, 276
- Bats, homing performance in, 201
- Blackbird, yellow-headed, breeding ecology of, 51
- Bliss, L. C., article, 125-155
- Bormann, F. H., article, 1-26
- Breeding, of yellow-headed blackbird, 51
- Breeding, season, of *Microtus*, 239
- Broadhead, Edward, article, 327-388
- Brooding, of yellow-headed blackbird, 58
- Bushnell, John H., Jr., article, 95-123
- California, *Microtus* populations, 239
- Capture-recapture, of *Microtus*, 241
- Climate, coastal Maine, 79-80
- Luzon, 392
- Clutch size, of yellow-headed blackbird, 56
- Controlled environments, 301
- Cordillera Central, Luzon, 389-419
- geology, 391
- grassland, 411
- pine forest, 389-419
- soils, 391
- Davis, Luckett V., article, 275-295
- Davis, R. B., article, 79-94
- Davis, Russell, article, 201-237
- Disease, of *Microtus*, 268
- Dispersal, of *Microtus*, 263
- Distribution, of *Mesopsocus* on larch trees, 336
- Ecotype function in the *Typha* community type, 297-325
- Ecotypic differentiation, 318
- Ectoprocta, populations of, 95
- Eggs, *Mesopsocus*, distribution and survivorship of, 336
- Environment, controlled, 301
- Eptesicus*, homing of, 206
- Evapotranspiration, 392-393
- Extinction, of a feral mouse population, 27
- Fire, and pine forest, Luzon, 389-419
- Food, of *Mesopsocus*, 329
- of *Microtus*, 268
- of yellow-headed blackbird, 63
- Funaria hygrometrica*, ecology of, 157-180
- greenhouse experiments, 164-175
- occurrence, 159
- responses to nutrients, 171-175
- spore dissemination, 161
- spore germination, 166
- succession after fire, 160
- Gause's hypothesis, 376
- Germination, *Typha*, 300, 302
- Grassland, Philippines, 411
- Gray, I. E., article, 275-295
- Growth, of *Ectoprocta*, 113
- of *Microtus*, 255
- Hoffman, G. R., article, 157-180
- Home range, of feral mouse, 33
- Homing, by bats, 201
- Juncus* marsh, 277
- Kaingin, Philippines, 399
- Kowal, Norman E., article, 389-419
- Krebs, Charles J., article, 239-273
- Larch plantations, Psocoptera populations on, 327
- Lidicker, William Z., Jr., article, 27-50
- Life history, of closely related *Mesopsocus* species, 327
- of yellow-headed blackbird, 51
- Longevity of *Ectoprocta*, 119
- McNaughton, S. J., article, 297-325
- Maine coast, climate, 79-80
- geology, 80-81
- soils, 81-82
- spruce-fir forest, 79-94
- Mesopsocus*, populations on larch in England, 327
- Michigan, *Ectoprocta* in lakes of, 95
- Microenvironments, alpine, 128
- plant development, 136
- precipitation, 135
- soil moisture, 135
- solar radiation, 131
- temperature, 132
- wind, 134
- Microtus*, populations of, 239
- Model, of four-species interaction, 370
- Montane forest, Luzon, 394-395
- Mortality, of *Ectoprocta*, 117
- of *Mesopsocus*, 356
- of *Microtus*, 239
- of yellow-headed blackbird, 60
- Mt. Data, Philippines, 389-419
- Mt. Washington, N. H., alpine, 125-155
- Mouse, feral population of, 27
- Movement, of *Microtus*, 262
- Muldrow glacier, Alaska, 181-199
- Mus*, declining population of, 27
- extinction of, 27
- Myotis*, homing of, 206
- Natality, of *Mesopsocus*, 356
- Nesting, success of, in yellow-headed blackbird, 58
- Niche, of interacting Psocoptera populations, 327
- of *Mesopsocus* species, 327
- North Carolina, insects in salt marshes of, 275
- Parasites, of feral mice, 45
- Patterns, biochemical, in *Typha*, 320-321
- Permafrost, 197
- Phenology, alpine, 136
- ecoclines, 306
- flowering, 308
- Typha*, 306-307
- Pine Forest, Philippines, 411-414
- in the tropics, 416
- in tropical S. E. Asia, 415
- Pinus insularis*, Philippines, 389-419
- Pinus strobus*, root grafts, 1-26
- Plant growth, alpine, 137
- Pleurococcus*, as *Mesopsocus* food, 327
- Plumatella*, populations of, 95
- Population, declining, of a feral mouse, 27
- Population density, of *Mesopsocus*, 327
- of *Microtus*, 241
- Population dynamics, of *Mesopsocus*, 346
- of natural populations of insects, 327
- Populations, of *Ectoprocta*, 95
- of *Mesopsocus* on larch in England, 327
- of *Microtus*, 239
- of *Plumatella*, 95
- of Psocoptera on birch in England, 327
- Predation, on *Ectoprocta*, 47
- on *Microtus*, 269
- Predators, of feral mice, 45
- Productivity, alpine, 125-155
- of *Typha*, 311
- on Mt. Washington, N. H., 125-155
- relation to thermoperiod and photoperiod, 316
- Psocoptera, populations on larch in England, 327
- Reproduction, of feral mouse, 35
- of *Microtus*, 249
- Root distribution, alpine, 138

- Root grafts, *Pinus strobus*, 1-26
 ecological significance, 22-24
 function, 2-14
 structure, 15-17
 tracer experiments, 17-20
 translocation by, 17-21
- Salt marshes, insects of North Carolina, 275
- Salt tolerance, *Typha*, 300, 301
- Sampling, of *Microtus* populations, 241
 of mouse populations, 28
 of salt marsh insects, 278
- Scars, of feral mice, 43
- Seed germination, *Typha*, 300, 302
- Sensory mechanisms, in bat homing, 223
- Sex ratio, of feral mouse population, 39
 of yellow-headed blackbird, 61
- Shifting cultivation, fire, and pine forest in the Philippines, 389-419
- Snow accumulation, and wind, 198
- Soil development with succession, 181-199
 permafrost, 197
 profiles, 188
- Soil, Luzon, 319
- Spartina* marsh, 277
- Spruce-fir forest, Maine, 79-94
 environmental correlations, 90-92
- Standing crop, alpine roots, 141
 Typha, 310-311
- Statistics, vital, of *Ectoprocta*, 112
 of insect populations, 327
- Succession, and soil development, 181-199
 on gravel outwash, 181-199
- Survivorship, of *Mesopsocus* species, 363
- Territory, of yellow-headed blackbird, 53
- Trophic relationships, of salt marsh insects, 288
- Typha*, community type, 297-325
 height, 302
 phenology, 306
 productivity, 312
 salt tolerance, 300
 seed germination, 300
 standing crop, 310
 vegetative reproduction, 304
- Tundra, climax, 193
- Uniform garden, 300
- Vegetative reproduction, *Typha*, 304-305
- Vierick, L. A., article, 181-199
- Wapshere, Anthony J., article, 327-388
- Weight, of feral mouse, 40
- Willson, Mary F., article, 51-77
- Xanthocephalus*, breeding ecology of, 51
- Yellow-headed blackbird, breeding ecology of, 51
- Zonation, of salt marsh insects, 275
